

Coding Challenge

General requirements:

- Implement using Swift
- Be sure to follow the designs, submissions not matching the designs will not be evaluated

Sample app:

- Create a 3 days weather forecast app with free weather API
 - <https://www.weatherapi.com>
- Follow the Figma design linked [here](#)
- Special Notes:
 - icons returned from API are low resolution and will appear pixelated in your submission, this is OK
 - The background image is static and does not change based on what location is selected by the user
 - The two sub items for 'today' are `wind_mph` and `humidity`
